3D TEXTURED PANELS

A very special and modern product brought to you by XYLOKAT

It brings life to the surfaces causing awe and admiration. It is a durable and very high quality product that responds fully to the current aesthetic trends of interior design.

The 3D textured panels are produced using a core material (usually MDF and plywood), faced with veneer. Our 3D textured panels can be used in the furniture industry (kitchen, bedroom, dining room, buffet, tv wall units, doors, etc.), as well as in special projects such as wall decoration, bar and restaurant decoration and retail shop furniture (equipment).

The panels are produced in reconstructed and natural Oak veneers, but it can also be produced in any available natural or reconstructed veneer, according to customers' specifications.

|---------------------|---------------------|
| Size accuracy | +/- 2.0mm per meter |
| Straightness | +/- 3.0mm per meter |
| Thickness allowance | +/- 0.3mm |

| | |
|-------------------|---|
| Density (kg/m³) | Approximately 720 - 800kg/m³ |
| Packing | The entire surface lying on pallet. |
| Storage | In dry and moisture/frost free with sufficient ventilation. The boards have to be stored with the entire surface lying. Boards with veneer should be sun-protected. Sufficient conditioning before processing is also very important. |
| Sawing | Use sharp hard metal sawing blades and a low sawing feed rate. Scoring is not essential. |
| Milling | Use hard metal tools for milling and profile cutting. |
| Drilling | The standard drilling tools for woodworking could be used. |
| Screws | We recommend primary drilling before using screws to avoid splitting. |
| Gluing | Standard wood glues and adhesives could be used. Formaldehyde-free glues are recommended. |
| Lacquering | Please follow the instructions of your lacquer manufacturer. |
| Recycling | Thermal/Energy recovery of the boards is uncomplicated (no PVC). |
